Weekly **MORBIDITY REPORT**

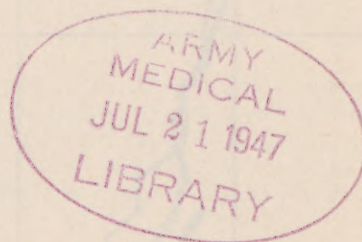

SHORE STATIONS IN CONTINENTAL UNITED STATES

NAVMED 104

WEEK ENDING 16 February 1946

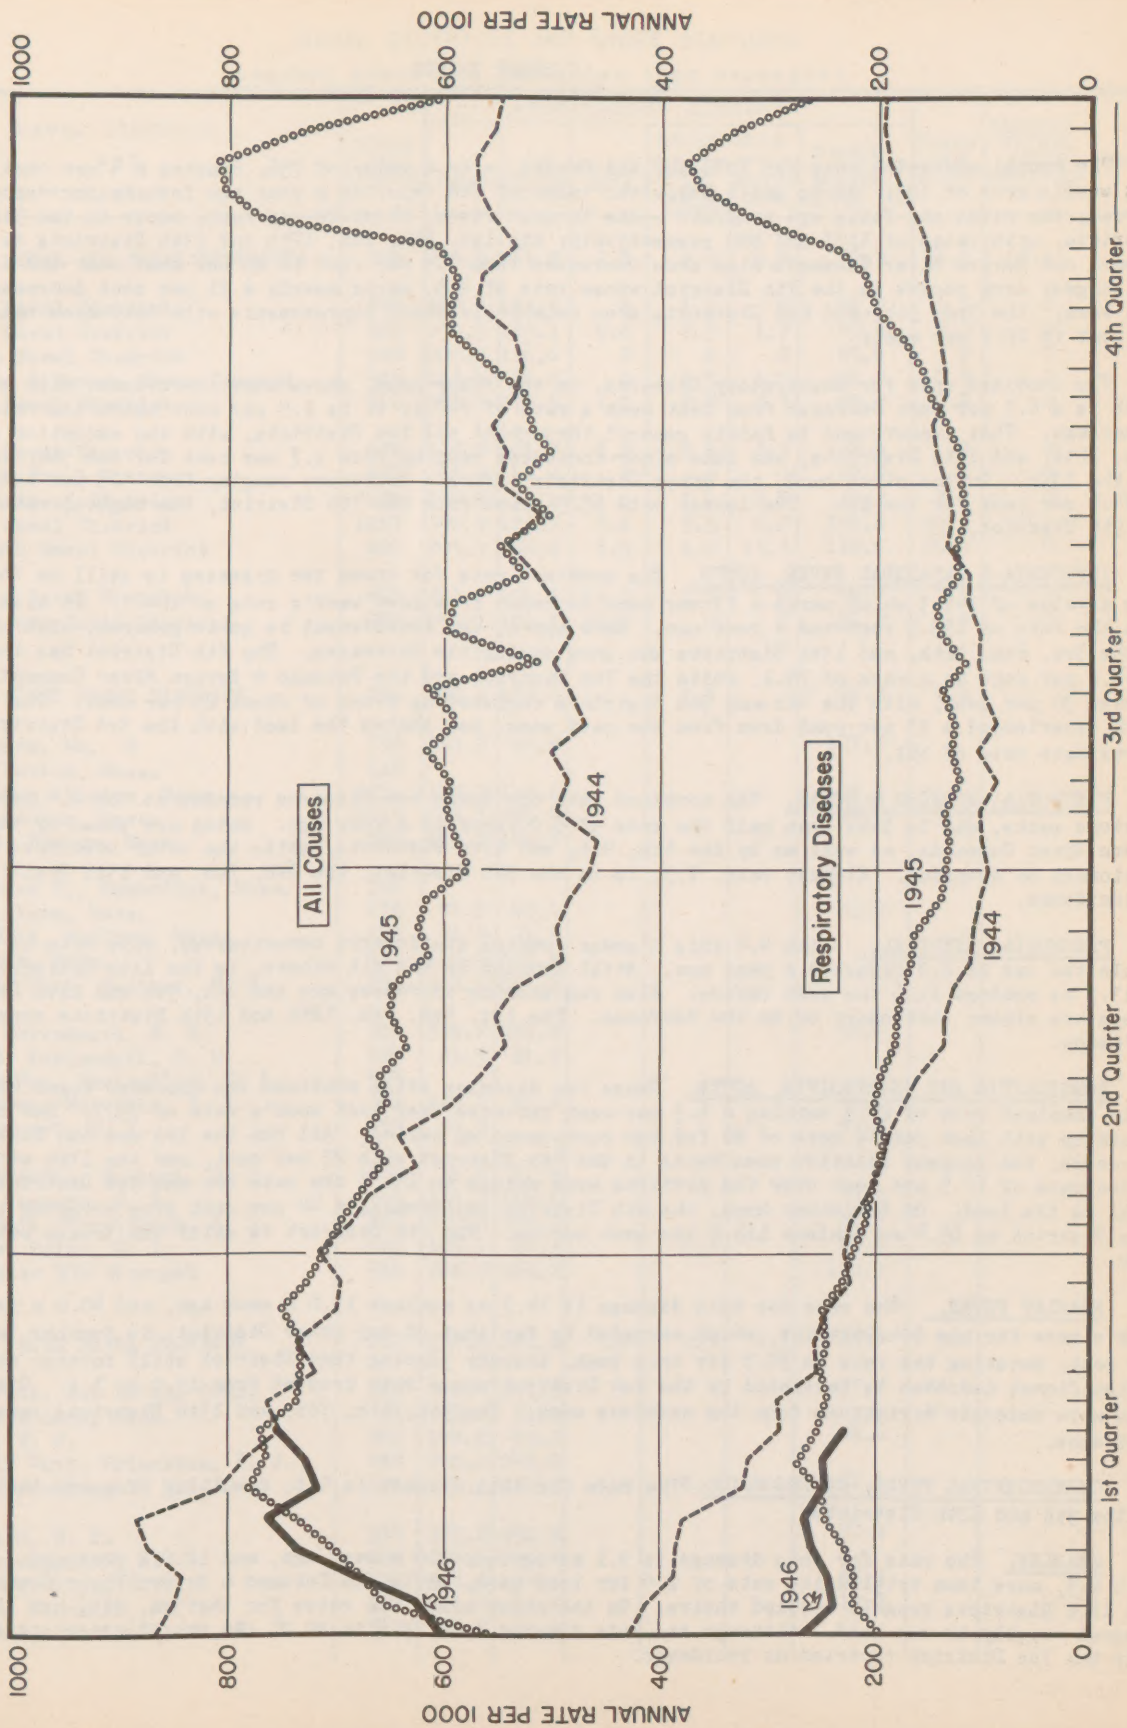

REPORT NO. 216

RESTRICTED—THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATED DIRECTLY OR INDIRECTLY TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCES

ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944 AND 1945.

CURRENT TRENDS
Week Ending 16 February 1946

The annual admission rate per 1000 for All Causes, with a value of 756, denotes a 4 per cent increase over last week's rate of 727; it is still below the value of 768 reported a year ago for the corresponding week. In general, the rises and falls are moderate --the largest rises, about 20 per cent, occur in the 9th and 11th Districts, with rates of 1107 and 880 respectively; the 1st, 4th, 6th, 12th and 13th Districts as well as the Potomac and Severn River Commands also show increases from 1.5 per cent to 10 per cent over the previous week. The largest drop occurs in the 7th District whose rate of 414, marks nearly a 21 per cent decrease from the past week; the 3rd, 5th, and 8th Districts show relatively minor improvements with decreases ranging from 3.7 per cent to 10.4 per cent.

The combined rate for Respiratory Diseases, on the other hand, shows some improvement with a value of 230.5, which is a 6.7 per cent decrease from last week's rate of 247.1; it is 8.9 per cent below the rate of 253 reported a year ago. That improvement is fairly general throughout all the Districts, with the exception of the 9th, 11th, 12th, and 13th Districts, who show minor increases ranging from 1.7 per cent for the 9th, to 11.4 per cent for the 13th. On the other hand, the other Districts indicate decreases ranging from 5.9 per cent for the 3rd, to 34.4 per cent for the 8th. The lowest rate 65.9 comes from the 7th District, the highest rate 390.9 is from the 9th District.

INFLUENZA & CATARRHAL FEVER, ACUTE. The combined rate for these two diseases is still on the down swing, with a value of 143.3 which marks a 13 per cent decrease from last week's rate of 164.7. It also compares favorably with the rate of 159.5 reported a year ago. Here again, the improvement is quite general, with the exceptions of the 3rd, 6th, 12th, and 13th Districts who show negligible increases. The 8th District has the maximum drop of 44.1 per cent to a rate of 75.1, while the 7th District and the Potomac & Severn River Commands have drops of over 30 per cent, with the 4th and 5th Districts registering drops of about 25 per cent. The 9th District, which experienced a 13 per cent drop from the past week, now shares the lead with the 3rd District, with an approximate rate of 181.

PNEUMONIA--BRONCHO & LOBAR. The combined rate for these two diseases remains at the 2.4 level of the two previous weeks, and is less than half the rate of 5.0 reported a year ago. Gains are shown by the Potomac & Severn River Commands, as well as by the 6th, 9th, and 11th Districts, while the other Districts are either stationary or dropping. Highest rate, 7.3, is in the 9th District; the 4th, 7th, and 13th Districts reported no incidence.

PNEUMONIA, ATYPICAL. With 4.4 this disease remains stationary; nevertheless, this rate is more than double the one of 2.0 reported a year ago. Still leading by far all others, is the 11th District with a rate of 13.9 as against 11.6 the week before. Also registering increases are the 6th, 9th and 11th Districts. The others are either stationary or on the decrease. The 1st, 4th, 7th, 12th and 13th Districts reported no incidence.

TONSILLITIS AND PHARYNGITIS, ACUTE. These two diseases still continue the increase begun after 29 Jan, their combined rate of 80.5 marking a 6.3 per cent increase over last week's rate of 75.7. But it still compares favorably with last year's rate of 86 for the corresponding period. All but the 3rd and 6th Districts show increases, the largest relative ones being in the 4th District with 22 per cent, and the 13th with 24 per cent. An increase of 16.5 per cent over the previous week raises to 196.6 the rate for the 9th District, which is still in the lead. On the other hand, the 6th District experiences a 44 per cent drop bringing the rate for this District to 65.4 as against 116.0 the week before. The 7th District is still the lowest with a rate of 22.0.

SCARLET FEVER. The rate for this disease is 14.3 as against 13.0 a week ago, and 40.0 a year ago. Last week's rate for the 9th District, which exceeded by far that of any other District, is further increased by 41 per cent, boosting the rate to 59.5 for this week, thereby placing that District still farther above all others. A significant decrease is indicated by the 1st District whose rate dropped from 15.0 to 1.1. Other Districts show more moderate variations from the previous week. The 4th, 6th, 7th, and 13th Districts reported no incidence.

CEREBROSPINAL FEVER, MENINGOCOCCIC. The rate for this disease is 0.1, resulting from one incidence in each of the 9th and 12th Districts.

MEASLES. The rate for this disease is 9.1 as against 8.0 a week ago, and 12.0 a year ago. The 1st District, with 6.5, more than tripled its rate of 2.0 for last week, while the Potomac & Severn River Commands, the 5th, and 11th Districts roughly doubled theirs. On the other hand, the rates for the 3rd, 8th, and 12th Districts dropped roughly by one half. Although its rate dropped from 23.6 to 20.2, the 9th District still tops the others; only the 7th District reported no incidence.
